**The Goal: Godly sustainable and abundant living and the means to produce and maintain it as our Creator designs and provides, whatever the economic and political conditions.**

## **Assessment of Household/Community Preparedness:**

- Who (family, friends, neighbors) are the objects of your concern?

---

---

---

---

---

- Where located – now and in crisis?

Now:

---

---

---

Crisis:

---

---

---

- Threats – both external and “local”?

---

---

---

---

---

- Flight options?

---

---

---

---

---

- Sustainable living preparedness by parameter.

- Food:

---

---

---

- Water

---

---

---

- First Aid and Health

---

---

---

- Shelter/Facilities

---

---

---

- Communications

---

---

---

- Sanitation

---

---

---

- Alternative Energy Off Grid

---

---

---

- Travel/Transport

---

---

---

- Defense

---

---

---

- Money/Barter for Exchange/Store of Value

---

---

---

- Useful Skills

---

---

---

- Supportive Community, Especially “Therapeutic Community”

---

---

---

- Asset allocation? – consider vulnerability and sufficiency
  - Intangible Assets (eg. stocks, bonds, deposits, annuities)

---

---

---

- Tangible Assets (eg. real property, equipment, consumables)

---

---

---

- “Core” Development Group who will guide development plan and implementation?

---

---

---

---

---

- “Team” who assume implementation tasks?

---

---

---

---

---

**Plan for Sustainable Living** – Once the necessity of creating a sustainable living environment is understood and its elements recognized, each household and community needs an implementation plan. What is your basic strategy that will provide for you and yours?

---

---

---

---

**Assistance in Implementing Plan** – Most important is the Plan and your commitment to it. Additional assistance required depends upon action plans and specific tasks required by the Plan. First, inventory the capabilities of the core group and available talent and other resources. This will help identify what additional assistance and other resources you and your community might need.

---

---

---

---

**“Pay it forward”** – Like God’s master plan for discipleship, sustainable living in any locale works best with broad participation, including those having limited ability to prepare. Their numbers will likely grow as more become underemployed, without capital, etc. They represent both needs and labor for the sustainable community. Must consider neighbors within proximity. Their unique characteristics, abilities, strengths, weakness, or threats?

---
